

Most people have heard about Isa-bin-Daud, but few have had the chance to read an eyewitness account of His Miracles. From the day he entered the world, the life of this Middle Eastern carpenter was full of miracles. His conception was unprecedented. Yet political and religious leaders made several assassination attempts from the day he was born. His parents left Palestine and took refuge in Egypt. When he returned to Palestine as a young boy, the infidel Romans still ruled his country. He experienced many uprisings, riots and mass suicide attacks. Yet he showed love and forgiveness to his enemies by miraculously healing and delivering them from evil spirits [jinn], feeding thousands and even raising the dead. Eyewitnesses recorded these events in detail, writing in the vernacular of the day. Isa was a leader of the people. The Miracles of Isa is one of those eye witness accounts, accompanied by maps and explanatory notes, which brings The Miracles of Isa to life for modern readers who speak English enriched by the linguistic heritage of Isa's Middle East.
